Hunt Pipeline Products manufactures Weld Support Sleeves to assist you in integrity repairs that are in the heat affected zone on a pipeline.

With having the clearance within the product this allows the Steel Repair Sleeve to pass over a joint weld.

Weld Support Sleeves are manufactured with the same strict quality control specifications as well as the unique serial number for traceability.

We manufacture the Weld Support Sleeves in sizes ranging from 6.625" ID up to 60" ID, material thickness ranges from 5/16" up to 3/4" and lengths up to 120".

Each sleeve comes with a 30 degree long seam bevel and square cut ends.

Vent holes and backing strips can be included.

Weld Support Sleeves can also be utilized at river crossings, bridge crossings and any other area that requires extra support.

Hunt Pipeline Products takes great pride in manufacturing Steel Repair Sleeve. 100% of all products produced in our factory undergo extreme scrutiny with regards to Quality Control.

Our products receive a unique serial number. This allows us to identify each part that leaves our facility. We maintain historical data with regards to Quality Control documents as well as Material Test Reports for each part.

Hunt Pipeline Products only utilizes structural plate steel and pressure vessel grade steel that is melted and manufactured in the USA.

We produce sizes ranging from 3.5" ID up to 60" ID, 120" lengths and thicknesses ranging from 5/16" up to 3/4".
Milled Groove for Backing Strip is available.

Each bundle includes the following:

- PVC tube containing Backing Strip
- PVC tube containing material test reports for the Steel Repair Sleeve and Backing Strip
- Each bundle is banded together with 4"x4" dunnage to save time and increase safety
- Vertical wood separators to eliminate damage while offloading and storage
- Separators between parts to prevent damage while shipping
